Heavy Duty External Doors

Pneumatic Operated Doors

Sliding & Hinged Pneumatic Operated Doors

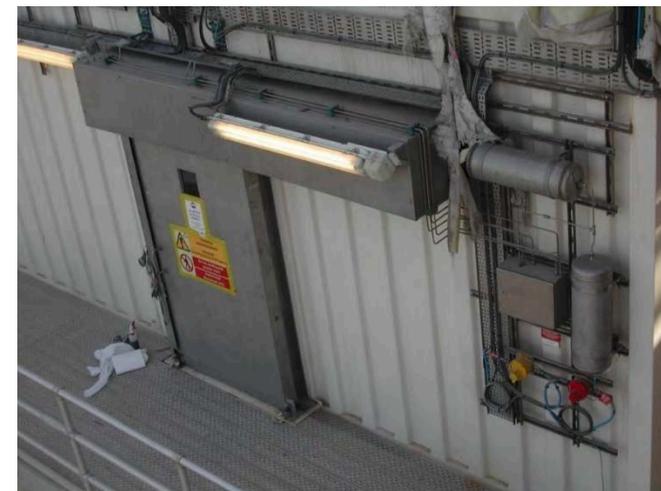

Suitable for Extreme Environmental Offshore conditions

All components made from AISI 316 in order to meet the Norsok rules. The unit is fully pneumatically operated and does not need any additional electrical items.

The drive system is equipped with a Fire safety valve (patented) in order to prevent door opening Scenarios under the action fire.

Air bottles (20 liter) used to operate the door at the loss of the power supply in case of emergency.

Door can either be operated by using the push Buttons or the door handle.

Electrical Operated Doors

Sliding Electrical Operated Doors

Suitable for Extreme Environmental
Offshore conditions

Back-up battery used to operate (10
times) the door at the loss of the
power supply in case of emergency.

Door can either be operated by using
the push buttons or the door handle.
